

# PREDATOR 350

The Predator 350 is a great “small” machine. It’s narrow, powerful and portable and comes with two engine options, a **Kohler 14HP** or **Honda 13HP**. These options are designed to meet the needs of our equipment rental customers who are quite often service agents for one or the other engine manufacturers. There are convenient lift points and a clever fold-over handle to allow you to fit this machine in any sized van or truck with ease.

Like all of our machines, the Predator 350 comes as standard with the US patented Multi-Tip cutter wheel which, just like the rest of our models, has two leading teeth, each with four cutter tips that can be changed in under a minute. This combination allows you to get maximum performance from a smaller machine and really makes the job easier.

At under 26 inches wide with an impressive cutting depth of 10 inches and a weight of only 275 pounds, you can get this machine anywhere.

The Predator 350 is superbly built with a perfectly balanced, low, centre of gravity. This is designed to make grinding with the Predator 350 easier. This machine is perfect for the smaller Tree Surgeon, Landscaper or Rental Company.

## Technical Specifications UK

|                |               |
|----------------|---------------|
| Engine         | Kohler 14hp   |
