

PREDATOR 50RX

The Predator 50RX is without doubt the most versatile Stump Grinder about. It is the only large, 50 HP machine on the market that can get in anywhere.

It's variable width track base travels from 31 inches to 47 at the touch of a button, allowing a big machine to fit through a gateway narrower than three feet with ease.

As standard, a high performance, incredibly compact, powerful and great looking radio controlled Stump Grinder but just as easily with our rear PTO, a Dozer, Tow Vehicle, Mulcher, Flail or Powerpack, anywhere you want.

We use the fully proportional, highly accurate and incredibly reliable Scanreco G2B radio control system. This is commonly found on cranes, it allows the operator to have the feel and control of a hydraulic lever, whilst having the flexibility and vision of a remote operator.

Whatever your requirements, a machine that can cut effortlessly to a depth of fifteen inches with a swing of sixty, fit through such a narrow gap, doesn't have a belt or clutch in sight, looks as good and works as well as the Predator 50RX has got to be worth checking out....

Technical Specifications UK
